Executive Summary

The Individuals with Disabilities Education Act (IDEA) and corresponding state law, the Exceptional Children's Education Act (ECEA), requires administrative units (AUs), via a school district, or Board of Cooperative Educational Services (BOCES) in Colorado, to identify and provide special education services to children with disabilities, ages three to twenty-one years. Special education services are provided by special education teachers, speech pathologists, occupational therapists, school psychologists, school social workers, school nurses, audiologists, aides, and other special service providers, to provide a free appropriate public education (FAPE) in the most appropriate environment for the child. There are excess costs for special education services, above and beyond general education costs for students. Special education funding should be provided to administrative units to pay for required special education services.

Current Colorado law does not provide for full funding of the excess costs for students receiving special education services. In 2022-23, state funding covered only 29% of the costs for providing special education services (see Figure 1) not covered by federal revenue. The Special Education Fiscal Advisory Committee (SEFAC) strongly recommends that Colorado continue to implement legislation and secure additional funding to ensure that state and federal funding cover the excess costs of providing special education services.

During the 2023-24 school year, funding for Tier A (all special education students) was \$1,750 per student. Tier B per pupil funding amount of \$5,618, was still below the \$6,000 statutory maximum intended for special education students with more significant needs. Tier B funding is supplementary to Tier A funding.

Due to the requirement to fund all Tier A students at \$1,750 per student, an overall increase in the number of special education students directly impacts the funding available for Tier B students. In 2022-23, Colorado School districts bore 71% of special education costs not covered by federal revenue from the local general fund, as represented below.

Figure 1 Special Education Expenditures by State and Local Share Only, 2022-23

In 2022, the General Assembly passed legislation to add an additional \$80 million in state funding to cover the excess costs of providing special education services. This legislation increased Tier A

funding to \$1,750 per student beginning in the 2022-23 budget year and requires an increase by the rate of inflation each year beginning with the 2024-25 budget year.

In 2023, Senate Bill 23-099 concerning funding for special education services, appropriated \$40,203,671 in the 2023-24 state fiscal year, to the Department of Education for special education programs for children with disabilities. This appropriation is from the state education fund created in section 17 (4)(a) of article IX of the state constitution.

It is important to note, beginning in 2023-24, the Colorado Department of Early Childhood (CDEC) became responsible to fund the general education portion, as established in House Bill 22-1295, for preschool age students with educational disabilities. The per pupil revenue (funded at 0.5 FTE or part-time) in accordance with the School Finance Act in 2022-23, and prior years, for a preschool child with an educational disability was eliminated.

Subsequently, the SEFAC is making the following recommendations for the 2025 legislative session.

Tier A Funding Recommendations

- The committee recommends identifying longer term solutions to fund special education in a manner that covers increases in expenditures annually due to an increase in students, inflation and changing needs, but also one that addresses the funding gap between state and local share.
- Consideration for Tier A funding to increase proportionally with other educational funding priorities to mitigate the current gap.
- Increased funding in Tier A would be a priority recommendation of the committee as every student who receives special education funding is eligible.

Tier B Funding Recommendations

- Increases to special education funding continue to be based on the 2006 statute maximum of \$6,000, which does not account for inflation or increased costs over the past 18 years. Legislative review of the statutory maximum is needed to establish a more relevant rate.
- Based on the Bureau of Labor Statistics inflation calculator, \$6,000 in 2006 would be equivalent to approximately \$9,300 in today's economy. Therefore, statutory changes are needed to reflect at least a statutory maximum of \$9,300 per Tier B student, fully funded, with annual inflationary increases. Using the data in Appendix E, the actual average per pupil costs for special education in the 2022-23 year were \$11,369. An increased Tier B funding amount to \$9,300, plus the Tier A amount of \$1,750, gets closer to the actual average per pupil cost of the 2022-23 school year.
- A rate for Tier B funding should be decided on regardless of cost for Tier A.

Educational Orphans Funding Recommendation

- No changes are recommended for the \$500,000 appropriation or the process by which the funds are allocated.

Preschool Special Education Funding Recommendations

- A new mechanism of funding is needed for preschool special education. All preschool students with a disability must receive general education to include special education and related services as per state and federal law.
- In order for the CDEC to fund the general education seat for preschool age children with educational disabilities, and as established in House Bill 22-1295, the per pupil revenue (funded at 0.5 FTE or part-time) in accordance with the School Finance Act was eliminated beginning in the 2023-24 school year. This amount in the 2022-23 school year was \$38,243,591 (Appendix A). These funds in 2022-23, and in years prior, were used to fund general education and special education costs. Funds should be restored to ensure equitable access to the special education funding portion for preschoolers with special education services. The current Universal PreK model does not account for this.
- A portion, or up to the full amount of \$38,243,591, must be allocated to local school districts and/or administrative units, to maintain the current level of special education services provided to preschool children with educational disabilities. Without this funding, the unreimbursed cost of special education will increase for school districts and/or administrative units meaning school districts will pay more to cover the excess costs of special education for preschool children with educational disabilities.
- Statute allows up to \$6,000 per pupil for a limited percentage of eligible Tier B students. SEFAC recommends that Developmental Delay be added to Tier B eligibility to create an additional revenue source for preschool age students with disabilities.

Current state law does not provide for full funding of the excess costs of the special education programming and services for students with a disability under IDEA or ECEA. The average excess cost of special education per student, Preschool and K-12 in 2022-23, above the general education cost, was \$11,876 per student (Appendix E). The SEFAC strongly recommends that Colorado implement legislation and secure additional funding to ensure that state and federal funding cover the excess costs of providing special education services. Based on 2022-23 data, this gap is currently represented by an unfunded amount of \$813,549,013 (Appendix E), which is the amount being paid by local school districts to cover special education costs.

Introduction

House Bill 06-1375 established the SEFAC by amending Article 20 of Title 22 of the Colorado Revised Statutes (C.R.S.). As specified in section 22-20-114.5, C.R.S., members of the SEFAC were first appointed by the State Board of Education (SBE) in September 2006. House Bill 11-1277 changed the composition of the SEFAC membership for the 2011-12 and all subsequent school years. The SEFAC legislation was scheduled to be repealed on September 1, 2021. Pursuant to section 2-3-1203(2)(b), C.R.S., the Department of Regulatory Agencies completed a review of the committee and submitted to the General Assembly a recommendation to extend the committee. Senate Bill 21-104 continues the SEFAC until September 1, 2031.

The SEFAC consists of 12 members, as follows:

- A representative from the unit in the department responsible for the administration of special education programs;
- A special education director with expertise in special education finance from a board of cooperative services;
- A business official from a small rural AU;
- A business official from a large urban or suburban administrative unit; and
- Eight special education specialists with appropriate statewide geographic representation.

The work of the SEFAC consists of:

- Determining the form and manner by which AUs document the high-costs they have incurred and by which they may apply to the committee for a high-cost reimbursement grant for either out-of-district or in-district high-cost placements (section 22-20-114.5 (3)(a), C.R.S.);
- Using 50% of the total appropriation to award grants to AUs for out-of-district placements and the remaining 50% to award grants to AUs for in-district placements (section 22-20-114.5 (3)(a.5), C.R.S.);
- Determining whether to award a grant to an AU, considering for each AU's application(s), the annual audited operating expenses for the preceding budget year and the percentage of those expenditures that represent the high-costs incurred in the previous budget year (section 22-20-114.5 (3)(b)(I), C.R.S.);
- Awarding grants for out-of-district placements by first prioritizing the AUs that spent the highest percentages, based on the AU's annual audited operating expenses in the preceding budget year, on high-costs incurred in the previous budget year in providing special education services to students in such placements (section 22-20-114.5 (3)(b)(II)(A), C.R.S.);
- Awarding grants for in-district placements by first prioritizing the AUs that spent the highest percentages, based on the AU's annual audited operating expenses in the preceding budget year, on high-costs incurred in the previous budget year in providing special education services to students in such placements (section 22-20-114.5 (3)(b)(II)(B), C.R.S.);
- Disqualifying any applications for AUs that have failed to provide the department with the data collected concerning special education programs as required by section 22-20-114 (6), C.R.S., including the count of assessed students receiving special education services (section 22-20-114.5 (3)(d), C.R.S.);
- Determining, on an annual basis, the threshold amount of costs incurred in providing special education services to a child with disabilities above which an AU may request reimbursement in the form of a grant (section 22-20-114.5 (3)(e), C.R.S.);
- Reviewing AU high-cost applications;

- Recommending allocations to the State Board of Education developed by the committee;
- Developing the statutorily required report (section 22-20-114.5 (5), C.R.S.); and
- Making recommendations on the future funding of special education (section 22-20-114.5 (5), C.R.S.).

The content of this report fulfills the responsibility of the SEFAC to provide recommendations regarding the future funding of special education. This report represents actual audited expenses incurred by AUs during the 2022-23 school year with reimbursement payments to AUs made in the fiscal year 2023-24.

Analysis of Special Education Funding Data

Pursuant to section 22-20-114.5 (4) C.R.S. the department shall gather and provide to the SEFAC data that includes but need not be limited to the following:

- The extent to which the amount of special education funding appropriated pursuant to section 22-20-114 (1), C.R.S., is distributed based on the needs of children with disabilities and the severity of the needs of such children (see Appendix A);
- The number of children with disabilities who receive special education services from each AU and the nature of the disability of each child who receives special education services from each AU (see Appendix B);
- Patterns of identifying children with disabilities that include but need not be limited to recognized incidence rates of over- and under-identification of children with disabilities at the AU, state, and national levels;
- The number of hours of special education services that each AU provides, disaggregated by disability; and
- The percentage of the school day during which children with disabilities receive special education services from the AU, disaggregated by disability.

Based on analysis of the 2022-23 school year, the committee made the following observations regarding Tier A and Tier B funding.

Tier A and Tier B Funding

Funding under the ECEA is allocated using a tiered methodology. All students with disabilities eligible for special education services are considered Tier A. Tier B funding is allocated for students who generally, but not always, will have more significant needs due to the severity of the disability. Tier B consists of students identified with one or more of the following disabilities: visual impairment, including blindness; hearing impairment, including deafness; deaf-blindness; serious emotional disability; autism spectrum disorders; traumatic brain injury; multiple disabilities; and intellectual disability.

2022-23 Tier A Funding

- Each AU receives \$1,750 for each student identified for special education services from the prior year Special Education December Count.
- The special education December 2021 funded pupil count generated funding of \$1,750 per student for 108,305 students for the 2022-23 school year. In the 2022-23 school year 112,593 students were served.
- The special education December 2022 pupil count showed that students identified for special education services and served in the 2022-23 school year were 112,593 and equaled 12.75% of the total public school student population in Colorado.
- The number of students eligible for special education services increased by 3.96% in 2022-23 from 2021-22, while the total student population of Colorado decreased by .4%.
- When there is an increase in the number of special education students in an AU from one year to the next, the AU provides services with no additional revenue to support increased numbers for a full year.
- In 2019-20 the total number of students identified as eligible for special education services was 108,481. In 2022-23 the total number of students eligible for special education services was 112,593. This increase of 4,112 students marks a 3.79% increase in total students served over the four-year period (see Appendix B).
- Total funding of Tier A students increased proportionately, consistent with the total number of students with disabilities.

2022-23 Tier B Funding

- Statute allows up to \$6,000 per pupil for a limited percentage of eligible Tier B students.
- During the 2021-22 school year, Tier B funding was \$3,401.44 per student, which includes \$14.27 per student from surplus in Educational Orphan funding. In the spring of 2022, an additional \$80 million was added for the 2022-23 school year. This increased the funding to \$4,455.81 per student, which includes \$15.27 per student from surplus in Educational Orphan funding and reflects a 31% increase in Tier B funding overall, with a 17.5% increase toward the current statutory maximum of \$6,000.
- Students funded in Tier B represent approximately 2.80% of the total Colorado student population and 21.94% of all special education students based on the December 1, 2022 count.
- In the 2019-20 school year, AUs served a total of 24,103 students identified as Tier B. In school year 2022-23, AUs served a total of 24,708 students who were identified as Tier B. This increase of 605 students marks a 2.51% increase in total students identified as Tier B and served over a four-year period (see Appendix B).
- In 2022-23, Tier B funding was \$4,455.81 per student, which includes \$15.27 per student from surplus in Educational Orphan funding, which is 74.3% of the \$6,000 per pupil maximum for Tier B students (see Appendix C).

Using available data from the 2023-24 school year, the committee noted these additional observations regarding state funding of special education.

2023-24 Tier A Funding

- The special education December 2022 funded pupil count generated funding of \$1,750 per student for 112,593 students for the 2023-24 school year.
- The special education December 2023 pupil count showed that students identified for special education services and served in the 2023-24 school year were 117,119 and equaled 13.29% of the total public school student population in Colorado.
- The special education December count for funded students increased by 3.89% in 2023-24 from 2022-23, while the total student population decreased by .2%.
- Given that funding for special education is based upon student count from the prior year, there can be a difference between the number of students that generated funds and the number of students served. In the 2023-24 school year there were 4,526 students who were served but not funded.

2023-24 Tier B Funding

- The special education December 2022 funded pupil count generated funding for 24,708 Tier B students.
- The special education December 2023 pupil count showed that Tier B students identified for special education services and served in the 2023-24 school year were 25,934.
- The special education December count for Tier B students who were served increased by 4.96% in 2023-24 from 2022-23.
- Given that funding for special education is based upon student count from the prior year, there can be a difference between the number of students that generated funds and the number of students served. In the 2023-24 there were 1,226 students who were served but not funded.

Funding was flat from 2006-07 for Tier A at \$1,250 per student, until the addition of \$80 million dollars as a result of Senate Bill 22-127 which increased Tier A to \$1,750 per student. There is fluctuating funding for Tier B, ranging from 47.5% of the \$6,000 maximum in 2019-20 to 74.3% of \$6,000 in 2022-23 (the highest-funded level).

Despite the addition of the \$80 million in state share for 2022-23, the funding level in fiscal year 2022-23 of 74.3% per student identified as Tier B falls short of the statutory maximum of \$6,000 per student and the costs for educating Tier B students. The statutory maximum of \$6,000 for Tier B was established in 2006 and is a much lower target than it should be in 2022-23 and subsequent years given annual inflation and increasing costs over the last 18 years.

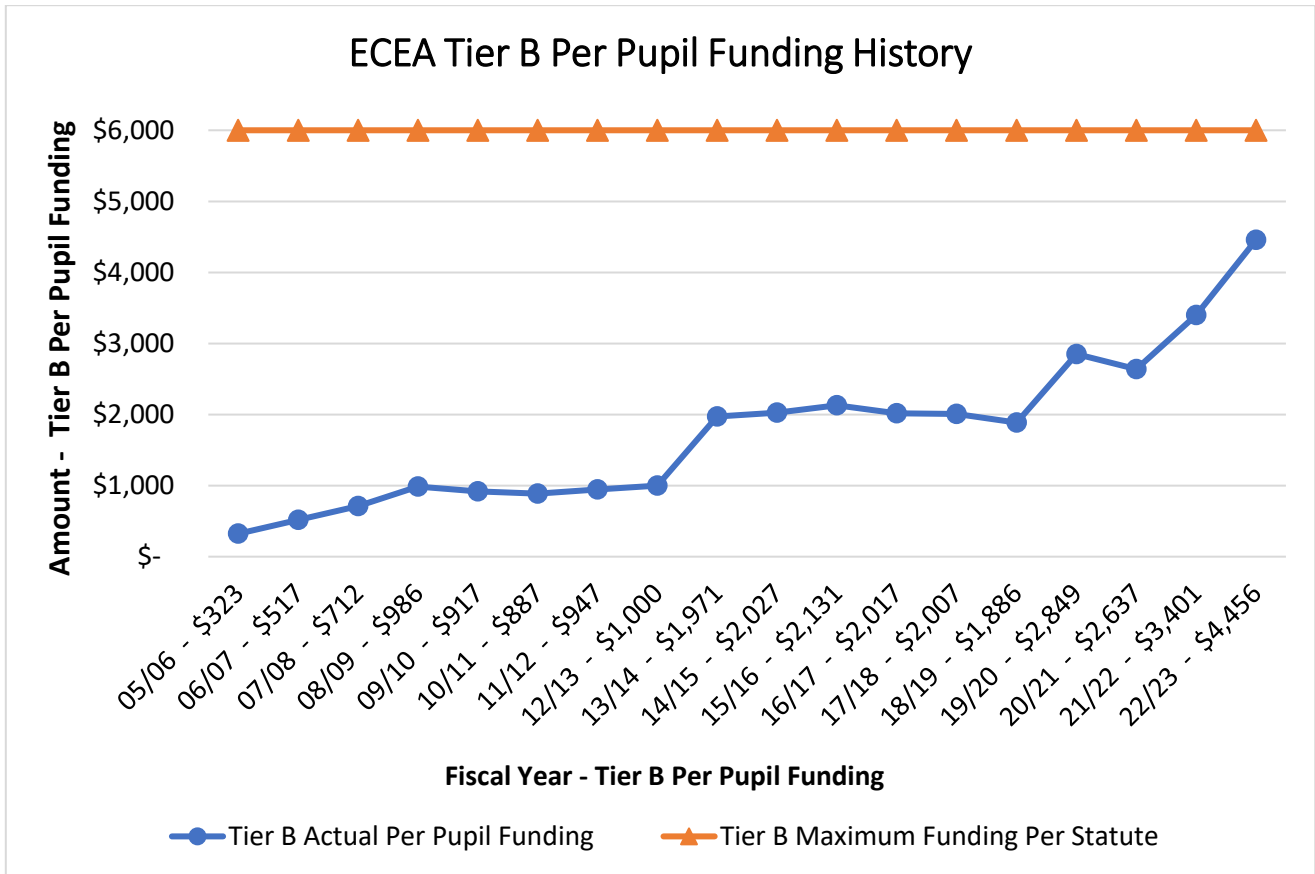

Figure 2 ECEA Tier B Per Pupil Funding History

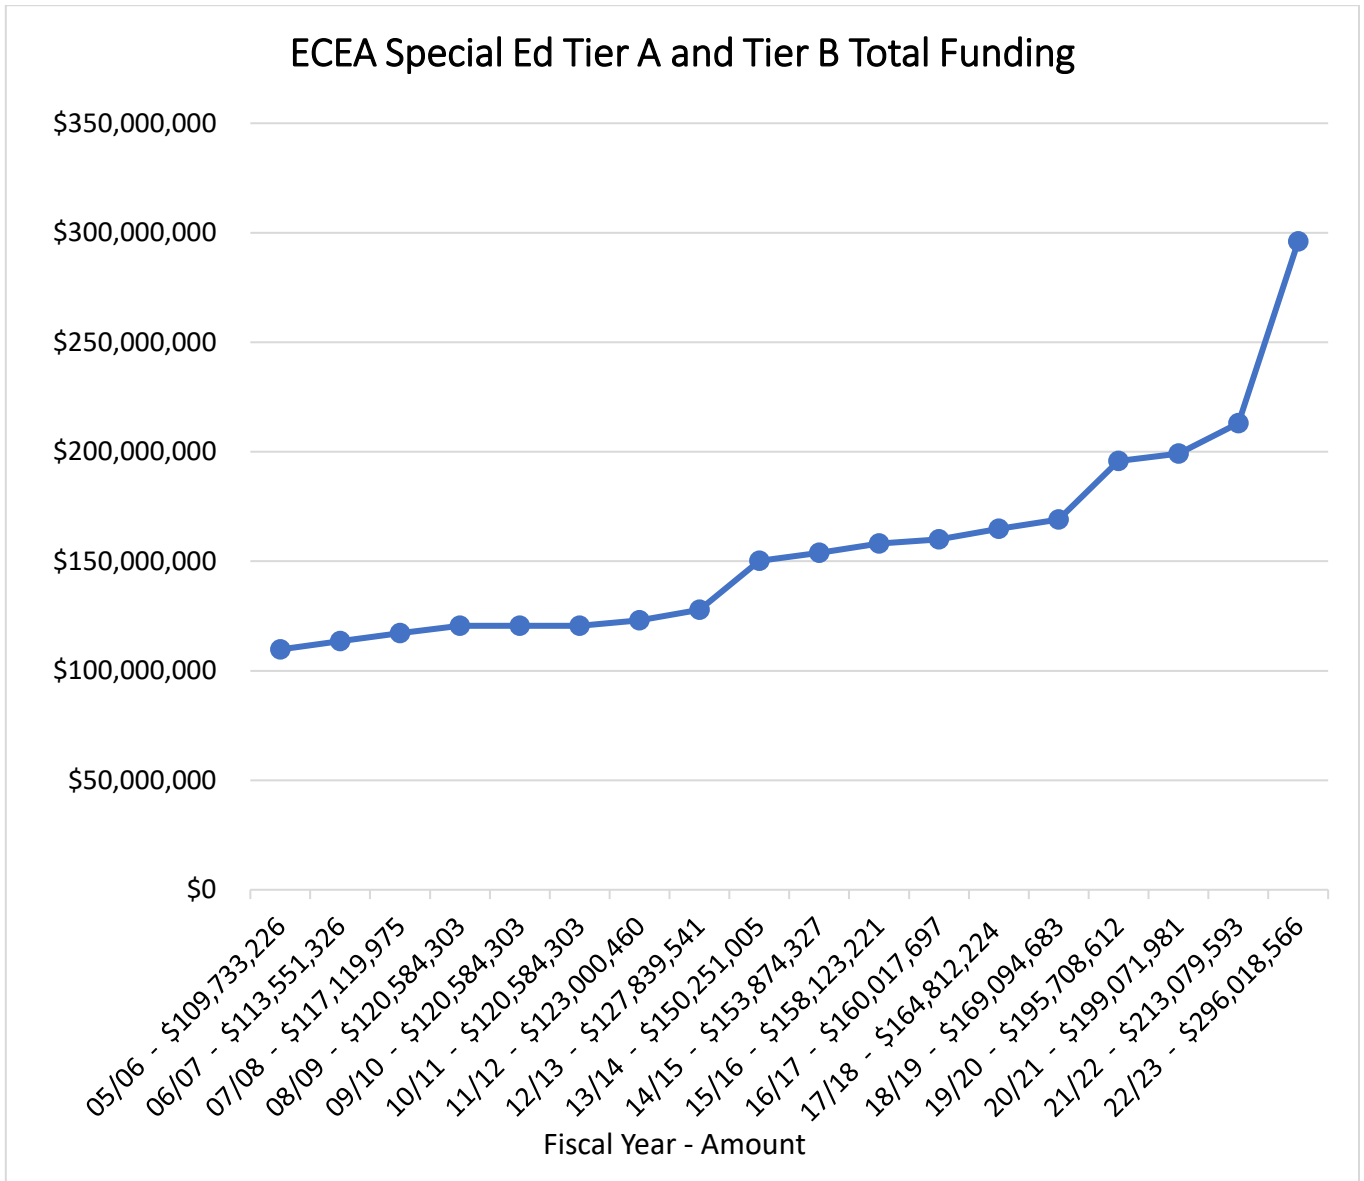

Figure 3 FY – ECEA Special Ed Tier A and Tier B Total Funding

The Gap Analysis (see Appendix E), based on the December 1, 2022 special education funded student count, identifies that the average cost for a special education student in fiscal year 2022-23 was \$11,876. Comparing this average with the state and federal funds allocated to AUs during 2022-23, there is a 61% gap between available funding and costs to educate students with disabilities in Colorado. Excluding federal funding and the expenditures offset by those funds, there is a 71% gap in funding in Colorado.

As of 2022-23, Colorado school districts were paying \$813,549,013 in unreimbursed special education costs for students with disabilities. Figure 4 illustrates the federal, state, and local share of special education funding allotted to Colorado schools.

Figure 4 Colorado Special Education Expenditures: Federal, State and Local Share, 2022-23

In 2022-23, local districts bore \$813,549,013 of the special education program costs; up from \$799,244,382 in the prior year. These costs represent \$14,304,631 more than the 2021-22 school year. This represents an increase of 1.8% to special education expenditures. The expenditure gap is greatly outpacing the funding added. In comparison, the state paid 29% of the state and local costs for educating special education students, or 29 cents of each dollar of a local district’s special education expenditures in fiscal year 2022-23.

Figure 5 Special Education Funding State and Local Share, 2022-23

Educational Orphans Funding

The ECEA allocates \$500,000 annually for Educational Orphans. An Educational Orphan is defined as a child with a disability for whom parental rights have been relinquished by the parents or have been terminated by the court; the parents of whom are incarcerated; the parents of whom cannot be located; or the parents of whom reside out of state, but the Department of Human Services has placed the child within the AU; or who is legally emancipated (section 22-20-114 (1)(a)(I)(B), C.R.S.).

The most current data available on Educational Orphans is for the 2023-24 school year. Two AUs received funding for 6 children reported in the 2022-23 December count at an average rate of \$11,728 per pupil. The actual cost for Educational Orphans in this year did not equal the \$500,000 allocation, and the balance of \$429,635 was distributed as Tier B funds (see Appendix A).

For the 2024 school year, in addition to the Educational Orphans funding, the AUs serving these students also receive \$1,750 Tier A funding per child. Most of these children have disabilities eligible for Tier B funding; therefore, the AUs receive additional funding under Tier B.

Special Education Preschool Funding

In the state of Colorado, there are funding sources to provide preschool for children, ages three to five, who are identified with an educational disability. Through the 2022-23 school year, funding sources included per pupil revenue (funded at 0.5 FTE or part-time) in accordance with the School Finance Act, ECEA, and IDEA.

In 2022-23, the per pupil revenue (funded at 0.5 FTE or part-time) in accordance with the School Finance Act was \$38,243,591, compared to a payment of \$32,776,269 in 2021-22. This allocation was paid directly to school districts. The total number of preschool age children with an educational disability in the pupil count used by school finance for this calculation in 2022-23 was 7,946.

Administrative units receive Tier A funding via ECEA for preschool aged children with an educational disability. In 2022-23, this ECEA allocation was \$1,750 annually per child. Preschool aged children may be eligible for Tier B funding based on disability, but due to their young age, may not be identified with an educational disability that qualifies them for Tier B funding.

Federal funding via IDEA is provided to administrative units for preschool special education. In 2022-23, the total IDEA regular allocation for preschool was \$4,501,324. Compared to an allocation of \$4,111,074 in the 2021-22 school year. When the IDEA allocation amount of \$4,501,324 for 2022-23 is divided by the school finance count of 7,946 preschool age children with an educational disability funded via the School Finance Act in 2022-23, an average of \$566 was paid per child.

Translation Funding

House Bill 23-1263 appropriated \$500,000 for the purpose of helping to offset some of the costs of translating IEP documents into the dominant language spoken in the home by the parent, guardian or legal custodian of the student with disabilities (see Appendix A).

Universal Pre-Kindergarten Maintenance of Effort Hold Harmless Funding

Funding for preschoolers with a disability generated by the School Finance Formula went away in 2022-23 as Universal PreK funding replaced the Colorado Preschool Program (CPP) funding. One time funding for Preschool Special Education was made to districts in 2023-24 to bridge the change in funding of preschool special education (see Appendix A).

High-Cost Out-of-District and In-District Reimbursement

Section 22-20-114.5 (5), C.R.S., requires the SEFAC to submit an annual report to the House and Senate education committees of the Colorado legislature that includes, at a minimum, a list of the AUs that applied for and received high-cost reimbursement during the preceding budget year. This report covers costs from 2022-23, paid in June 2024.

Because the SEFAC's work largely reflects the data obtained from a voluntary application process, this report does not fully reflect the additional funding needed to support the costs of educating special education students in high-cost out-of-district and in-district placements or programs in Colorado.

A total of \$4 million was appropriated under ECEA to reimburse AUs for students in high-cost placements or programs, also known as Tier C. The total appropriation consists of \$2 million for students in high-cost out-of-district placements or programs, and \$2 million for students in high-cost in-district placements or programs. This report represents the 17th year of high-cost reimbursements and the 15th year that a total of \$4 million was appropriated to reimburse AUs for students identified as high-cost (Tier C). The SEFAC maintained the eligibility threshold for reimbursement at \$40,000 per student for high-cost out-of-district placements and at \$25,000 per student for high-cost in-district placements.

The SEFAC has adopted the following values to guide the decision-making process:

- It is essential to communicate to the AUs that high-cost reimbursements are awarded on an annual basis and fluctuate depending on the relative fiscal impact per district and the total dollar amount represented in the applications received for that year;
- Allowable costs should include only those incurred for the individual child, related to special education services, and not general education and/or special education overhead costs that would otherwise already be incurred by the AU; and
- Applications should be reimbursed at 100% of expenditures minus revenues until money runs out in order to honor the legislative intent of meaningful reimbursement.

The SEFAC defines high-costs as set out in statute as the costs incurred by an AU above the threshold amount of \$40,000 for out-of-district students and \$25,000 for in-district students and their fiscal impact on the total district expenditures. The costs must differ significantly in the costs for other children receiving special education services in that AU.

Using the same uniform process annually since 2006, the SEFAC reviewed applications from AUs and determined which grant applications to approve and the amounts to be awarded after

applicable revenues were deducted from the costs submitted for reimbursement. In making these decisions, the SEFAC considered each district’s annual expenditures for each special education student application and the percentage those expenditures represented of the districts total audited expenditures.

The following is a summary of the applications received for 2022-23 expenditures and paid in June 2024.

Number of Applications Funded

- The \$2 million appropriated for in-district applications funded 60 of 206 applications (29.1%).
- The \$2 million appropriated for out-of-district applications funded 25 of 98 applications. (25.5%).

Number of AUs Receiving Funding

- **In-District:**
 - a. 20 of 64 AUs submitted high-cost applications.
 - b. 10 AUs received funding for all or some of the applications submitted.
- **Out-of-District:**
 - a. 17 of 64 AUs submitted high-cost applications.
 - b. 7 AUs received funding for all or some of the applications submitted.

Table 1 shows the high-cost reimbursement of applications received for in-district placement by AU in the 2023-24 fiscal year including the total amount requested, amount not funded, and amount funded.

Table 1: High-Cost Reimbursement for In-District Placement for FY 2022-23 Special Education Student Expenditures Reimbursed in FY 2023-24

AU Number and Name	Total Amount Requested	Amount Not Funded	Amount Funded
03040 Arapahoe 6, Littleton	\$77,929.45	\$77,929.45	\$0.00
07020 Boulder RE2, Boulder Valley	\$437,586.63	\$437,586.63	\$0.00
18010 Douglas Re 1, Castle Rock	\$620,940.62	\$620,940.62	\$0.00
19205 Elizabeth School District	\$174,190.76	\$174,190.76	\$0.00

Table 3 summarizes the gap between funding levels for high-cost services and applications received.

Table 3: Additional Funding Needed to Fully Fund Colorado Special Education High-Cost Applications: 2022-23 Costs for 2023-24 Funding Year

	In-District High-Cost Applications for 2022-23 Expenditures	Out-of-District High-Cost Applications for 2022-23 Expenditures
Total Amount Requested by AUs	\$9,359,448	\$7,895,561
Funded	\$2,000,000	\$2,000,000
Amount Not Funded	\$7,359,448	\$5,895,561
Revenues Deducted from Claims	\$3,087,574	\$1,459,852
Additional Amount Needed to Fully Fund Claims*	\$4,271,874	\$4,435,709

*NOTE: Due to the voluntary and time-intensive nature of the application process, the data represents less than half of the Colorado AUs. The actual additional funding needed would be greater than this amount if all high-cost students were included.

Recommendations of the SEFAC

Legislation in the spring of 2022 (S.B. 22-127) added an additional \$80 million in state funding to cover the excess cost of providing special education services, increasing Tier A (all special education students) per student funding to \$1,750 beginning in the 2022-23 budget year. This was the first increase from \$1,250 per student since 2006. Senate Bill 22-127 requires that the per student rate increases by the rate of inflation each year beginning with the 2024-25 budget year. This requirement increased the per pupil funding of Tier A to \$1,840.26 for 2024-25.

The additional \$80 million in state funding, via Senate Bill 22-127, also increased the Tier B (students with more significant needs) per student funding to \$4,456, which includes \$15.27 per student from surplus in Educational Orphan funding. This is approximately 74.3% of the statutory maximum of \$6,000. Colorado statute authorizes funding for each Tier B eligible student at an additional \$6,000, supplementary to the \$1,750 for all special education students (Tier A). In 2022-23 the Tier B per pupil funding is still below the \$6,000 intent of the statutory maximum set in 2006. While Tier B funding has in 2024-25 reached the \$6,000 per pupil funding maximum set in statute in 2006, it still falls short of the per pupil cost of educating students with disabilities which for 2022-23 was

\$11,876 (see Appendix E). Though 2022-23 data is a couple of years old, it is the most recent year for which all data is available to calculate Appendix E.

In 2023, Senate Bill 23-099 concerning funding for special education services, appropriated \$40,203,671 in the 2023-24 state fiscal year, to the Department of Education for special education programs for children with disabilities. This appropriation is from the state education fund created in section 17 (4)(a) of article IX of the state constitution. The committee is appreciative of the bipartisan efforts to increase the state share of special education funding. However, there is continued work to do to increase the state share to cover the excess cost of providing special education services to students in Colorado.

Increases to special education funding, Tier B allocations specifically, continue to be targeted at meeting the \$6,000 maximum set 18 years ago in statute in 2006. The \$6,000 statutory maximum does not account for increases in inflation or increased special education costs over the past 18 years. The statutory maximum requires adjustment to a more comparable rate that reflects current costs associated with providing special education services to all students in Tier A and Tier B.

The committee recommends continuing to identify longer term solutions to fund special education in a manner that not only covers increases in expenditures annually to account for the projected increase in students, inflation, and changing needs, but also one that addresses the funding gap between state share and local share and works to fund a base percentage of all special education costs annually. A long-term solution is needed to increase the state share of special education expenditures to keep up with increasing costs due to pupil growth, while also reducing the local share committed annually to special education expenditures from the general fund of local districts.

Without additional dollars allocated to ECEA, Tier B will continue to decrease proportionate to the increase of Tier A. Thus, an overall increase in special education funding is essential so that the increase in Tier A funding does not diminish available funds for Tier B.

Immediately, there needs to be a mechanism for funding preschool special education (ages three – five) to include general education and special education costs. Beginning in 2023-24, the Colorado Department of Early Childhood (CDEC) is responsible for the general education costs of providing equitable access to preschool for children with an educational disability. In this new funding model, the general education seat is paid to the preschool enrolling a child with an educational disability at the local coordinating organization (LCO) rate established by the CDEC. All children with an educational disability are general education students first, and as such, should be funded as a general education student at the same rate as non-

disabled peers.

It is important to note that the per pupil revenue funded (at 0.5 FTE or part-time) in accordance with the School Finance Act for a preschool child with an educational disability was eliminated when House Bill 22-1295 established the CDEC funding of the general education seat. The School Finance Act funding in the 2022-23 school year was \$38,243,591. A portion of this revenue was used by school districts to fund special education services by early childhood special education teachers, speech pathologists, occupational therapists, school psychologists, school social workers, school nurses, audiologists, aides, and other special service providers, to provide a free appropriate public education (FAPE) in the most appropriate environment for the child.

For all years prior to 2023-24, the amount of revenue from School Finance is included in the Special Education Funding GAP by AU/BOCES Analysis (Appendix E). When this amount from School Finance is removed from the GAP Analysis in the 2023-24 school year, the unreimbursed cost of special education will increase for school districts, meaning school districts will pay more to cover the excess costs of special education for preschool children with educational disabilities.

Since the revenue from School Finance no longer funds a portion of the special education cost, the only remaining revenue that is guaranteed for the provision of special education services is ECEA Tier A funding, which in 2022-23 is \$1,750 annually per eligible child and IDEA preschool. Based on the 2022-23 IDEA preschool allocation of \$4,501,324, and the 7,946 School Finance funded count of preschool children with educational disabilities, the average funding would be \$566 per eligible child. Current ECEA Tier A and Tier B allocations, and IDEA preschool allocations, are insufficient to maintain the current level of special education services to preschool age children with educational disabilities.

The Individuals with Disabilities Education Act and corresponding state law, the Exceptional Children's Education Act, require administrative units, with parent consent, to identify and serve preschool children (typically three- and four-year-olds) with disabilities, regardless of their preschool setting.

Funding of the general education seat for preschool students with disabilities via the CDEC does not solve the need for funding to pay for the excess cost of special education. All preschool students with a disability must receive education to include special education, and related services as applicable as per state and federal law.

Subsequently, the SEFAC is making the following recommendations for the 2024 legislative session:

Tier A Funding Recommendation

- The committee recommends identifying longer term solutions to fund special education in a manner that covers increases in expenditures annually due to an increase in students, inflation and changing needs, but also one that addresses the funding gap between state and local share.
- Consideration for Tier A funding to increase proportionally with other educational funding priorities to mitigate the current gap.

- Increased funding in Tier A would be a priority recommendation of the committee as every student who receives special education funding is eligible.

Tier B Funding Recommendation

- Increases to special education funding continue to be based on the 2006 statute maximum of \$6,000, which does not account for inflation or increased costs over the past 18 years. Legislative review of the statutory maximum is needed to establish a more relevant rate.
- Based on the Bureau of Labor Statistics inflation calculator, \$6,000 in 2006 would be equivalent to approximately \$9,300 in today's economy. Therefore, statutory changes are needed to reflect at least a statutory maximum of \$9,300 per Tier B student, fully funded, with annual inflationary increases. Using the data in Appendix E, the actual average per pupil costs for special education in the 2022-23 year were \$11,369. An increased Tier B funding amount to \$9,300, plus the Tier A amount of \$1,750, gets closer to the actual average per pupil cost of the 2022-23 school year.
- A rate for Tier B funding should be decided on regardless of cost for Tier A.

Educational Orphans Funding Recommendation

- No changes are recommended for the \$500,000 appropriation or the process by which the funds are allocated.

Preschool Special Education Funding Recommendations

- A new mechanism of funding is needed for preschool special education. All preschool students with a disability must receive general education to include special education and related services as per state and federal law.
- In order for the CDEC to fund the general education seat for preschool age children with educational disabilities, and as established in House Bill 22-1295, the per pupil revenue (funded at 0.5 FTE or part-time) in accordance with the School Finance Act was eliminated beginning in the 2023-24 school year. This amount in the 2022-23 school year was \$38,243,591 (Appendix A). These funds in 2022-23, and in years prior, were used to fund general education and special education costs. Funds should be restored to ensure equitable access to the special education funding portion for preschoolers with special education services. The current Universal PreK model does not account for this.
- A portion, or up to the full amount of \$38,243,591, must be allocated to local school districts and/or administrative units, to maintain the current level of special education services provided to preschool children with educational disabilities. Without this funding, the unreimbursed cost of special education will increase for school districts and/or administrative units meaning school districts will pay more to cover the excess costs of special education for preschool children with educational disabilities.
- Statute allows up to \$6,000 per pupil for a limited percentage of eligible Tier B students. SEFAC recommends that Developmental Delay be added to Tier B eligibility to create an additional revenue source for preschool age students with disabilities.

Current state law does not provide for full funding of the excess costs of the special education programming and services for students with a disability under IDEA or ECEA. The average excess cost of special education per student, PreK-12 in 2022-23, above the general education cost, was \$11,876 per student (Appendix E). The SEFAC strongly recommends that Colorado implement legislation and secure additional funding to ensure that state and federal funding cover the excess costs of providing special education services. Based on 2022-23 data, this gap is currently represented by an unfunded amount of \$813,549,013 (Appendix E), which is the amount being paid by local school districts to cover special education costs.

Conclusion

The SEFAC appreciates the opportunity to assist with this important funding issue specific to serving special education students. The committee believes that the high-cost appropriation is a critical step toward meeting the needs of districts that are financially impacted by serving children identified with high-cost special education programming. The committee asks the Colorado General Assembly for continued leadership in recognizing this critical need.
